Class 4

Information Regarding Science and Social Studies (SST) Curriculum

Subject Approach

In Middle Wing, "EVS" is taught as two separate subjects: Science and Social Studies. This allows students to build a deeper understanding of each discipline, preparing them for the academic structure of middle school as they move from lower to higher classes.

Syllabus Structure

- Previous NCERT Textbook (***Looking Around***):
  27 Chapters: *Syllabus Distribution: 13 chapters for Science*
  14 chapters for SST.

- New NCERT Textbook (***Our Wondrous World***):
  10 Chapters: *Syllabus Distribution: Only 5 chapters for Science*
  5 chapters for SST.

The Need for Supplementary Content

Our academic calendar consists of four assessment cycles: ***PA1, Half-Yearly, PA2 and the Annual Exam***. A total of 5 chapters per subject is insufficient to cover these four major exams with the necessary depth. **Therefore, we are supplementing the new curriculum with selected chapters from the previous NCERT book.**

Resources and Support

- **Google Classroom:** A digital copy of the previous textbook will be uploaded to the Google Classroom.
- **Study Materials:** Practice worksheets and study material for these chapters will be provided digitally.
- **Classroom Teaching:** Teachers will cover the selected chapters from the previous textbook with the same detail and importance as the new NCERT content.

Our goal is to ensure a balanced syllabus and a strong academic foundation for every student.

List of Chapters

Kindly refer to the attached list for the specific chapters we will be covering from both the New NCERT and the Old NCERT books for Science and SST.

CHAPTERS COVERED FOR THE ACADEMIC YEAR 2026-27

CLASS: 4 (2026-27)

SUBJECT: SOCIAL STUDIES

S. No.	CHAPTER NAME	NCERT (OLD: Looking Around NEW: Our Wondrous World)	TERM (1/2)
