Subject: LogIQids – Mental Aptitude Programme aligned with CBSE Computational Thinking & Artificial Intelligence (CT & AI)

Dear Parents,

Over the past year, the growing importance of logical reasoning and critical thinking across all classes has become increasingly evident, further reinforced by the introduction of CT & AI in Classes 3 to 8 by the CBSE. In this context, the Mental Aptitude Development Programme is being continued in collaboration with LogIQids and Techfest IIT Bombay for students from KG to XII.

This programme, offered completely free of cost, is designed to nurture:

- Logical reasoning
- Critical thinking
- Problem-solving ability
- Analytical mindset

These are not merely academic skills, but life skills.

Students may access the programme through a computer or mobile device and progress at their own pace, but it is essential that they attempt the exercises independently, as true learning comes through personal engagement, reflection, and effort. You will soon receive a customised hard copy with instructions to initiate the programme online.

We strongly urge all parents to encourage sincere participation, as logical reasoning is a foundational skill that spans all subjects and stages of learning, building confident and independent thinkers from KG through Class XII. With Computational Thinking and Artificial Intelligence already formalised up to Class 8 by the CBSE and likely to extend into senior classes, potentially as part of the Board examination framework, it is essential that students approach this area with due seriousness.

Let us work together to ensure that our students do not merely learn, but learn how to think.

Warm regards,

Br. Robert Fernandes

An IIT-IIM Alumni Venture

LOGIQIDS MENTAL APTITUDE DEVELOPMENT PROGRAM

Dear Parents & Students,
We are happy to share that **St Columba's School, New Delhi** has partnered with LogIQids and Techfest, IIT Bombay to introduce an exciting and enriching program for our students.
This program is being offered FREE of Cost to our students of **Sr KG to Class 12**. We are sure that this initiative will add a lot of value and have hence registered all our students for this program.

HOW WILL THIS PROGRAM BENEFIT YOUR CHILD?

This program, designed by IIT IIM alumni, helps develop skills like **analytical thinking & problem solving abilities** in children. These skills are really helpful because they are:

Most Essential 21st Century Skills

Basis of Coding AI, ML, Robotics etc

Tested in entrance exams like CAT, SAT, GMAT, UPSC, etc.

Evaluated in hiring for Microsoft, Google, etc.

PROGRAM DETAILS

1 Practice Worksheets
